1973 article index

Systems Management Principles

Planning For The Metric Challenge
The metric system, preferred by the rest of the world, is coming in the U.S., and the systems professional must be ready. (July)
Joseph L. Pokorney

Privacy, Our Problem For Tomorrow
If and when an invasion of privacy occurs, it is people who are gathering, storing, and misusing the data, not the computer. (July)
Hank E. Koehn

Self-Taught Management Training Program, A—Part I
Here is a two-part, do-it-yourself article that tells what steps to take to develop your managerial talents in your spare time. (Sept.)
Dr. Frank Greenwood and Dr. Nicolai Siemens

Self-Taught Management Training Program, A—Part II
Here is the final part of this article which tells how to raise yourself to a satisfactory level of management performance at your own pace. (Oct.)
Dr. Frank Greenwood and Dr. Nicolai Siemens

Sound Systems Renew Hope For Education
Sound EDP and systems planning could be the solution to the problems that high costs and student unrest have caused the universities. (Nov.)
Dr. Donald L. Mays

Towards Professionalism In Systems Design
What are the criteria that make an occupation a profession? The author examines these to show what are the determining factors. (Jan.)
M. C. Dobelis

What Top Management Doesn't Need To Know
To get the full benefits from the computer top management must determine what and how much it has to know about computer technology. (Feb.)
Woodrow W. Jenkins

Managing the Systems Effort

Are Companies Bugged About Bugging?
It is the data communicator who must be concerned about the theft of the data that is entrusted to him to transmit. (Jan.)
Hank E. Koehn

Data Entry: A Cost Giant
Data preparation is expensive for any data processing installation. The author compares costs and effectiveness of today's systems. (Aug.)
Dr. Alfonso F. Cardenas

Designing Rational Systems
The authors combine a decision oriented approach to designing an information system with the problem solving approach of systems analysis. (Jan.)
Dr. David J. Werner, et al.

Economics Of Word Processing, The
Word processing is not an end in itself, but a part of the total business system to be used when and if there are advantages. (Nov.)
Benjamin W. Tartaglia

Help For The Manager-User
Unless EDP management works with the functional manager from the start an advanced system will not work in that manager's area. (Nov.)
Dr. Joan G. Schroeder

How To Capitalize On Your Staff
If management can capitalize on the quantitative capabilities of its staff, it can make better use of quantitative techniques for decision making. (Nov.)
Thomas W. Ferratt and Frederick A. Starke

Inclusive Methods Of Systems Design
Many systems fail because they do not provide for the human element. There must be cooperation between the behavioralist and the analyst. (Feb.)
Jane H. Warren

Line Standards For Office Control
With costs for office material and labor continuing to rise, the basis for a workable manpower control system may be line standards. (Feb.)
Wilbur J. Fuhro

Need For Good Procedures, The
Too often the systems analyst must put aside his main duties to write procedures. This results in an inefficient use of his time. (June)
Clifford W. Coughlin

Project Control
Although the process of estimating project time cannot be an exact science, there are some guidelines for the estimator to follow. (May)
Harvey M. Weiss

Project Selection Methods
Here are some ways to help you decide which projects to fund when there are more worthwhile projects than there is capital to spend. (Aug.)
Dr. Victor A. Zaloom

Stop Controlling The Programmer
Managing Programmers is first a people problem and then a technical problem. Just adding more controls will not increase efficiency. (June)
David A. Radius

Study Of Project Management Techniques, A
This article tells the results of a research project designed to gather data about the use of project management techniques. (Oct.)
Michael J. Frankwicz

System Implementation And Evaluation
The author shows what steps must be taken to make a system successful once the method of implementation has been chosen.
I. Trotter Hardy, Jr.

Time: The Analyst's Basic Resource
Project success lies in the effective use of all available resources by the systems manager. But, the key resource is time. (Nov.)
Leslie H. Matthies

Selection and Training of Systems Personnel

Information Systems In Personnel—Part I
If personnel information is computerized without an overall systems plan, data can become hard to find and out of date. (Aug.)
Dr. Edward A. Tomeski and Dr. Harold Lazarus

Information Systems In Personnel—Part II
Here are the results of a study to determine to what extent the computer is being used by the personnel department for its applications. (Sept.)
Dr. Edward A. Tomeski and Dr. Harold Lazarus

In-House EDP Training
When there are only a few individuals to be trained at one time, there are several techniques that can be used at a reasonable cost. (Feb.)
K. Ray Smith

Management Resource Program
An inherent responsibility of each manager's job is that of personally developing new management personnel. (Dec.)
Vincent R. Ceriello and Leonard Linden

Out-Of-Date Employee In An Up-To-Date World, The
Job obsolescence should be of prime importance to business because it bloats the organization beyond the capacity to operate efficiently. (Oct.)
James C. Criss

Self-Taught Management Training Program, A—Part I
Here is a two-part, do-it-yourself article that tells what steps to take to develop your managerial talents in your spare time. (Sept.)
Dr. Frank Greenwood and Dr. Nicolai Siemens

Self-Taught Management Training Program, A—Part II
Here is the final part of this article which tells how to raise yourself to a satisfactory level of management performance at your own pace. (Oct.)
Dr. Frank Greenwood and Dr. Nicolai Siemens

Turnaround Concept For Personnel Records
The turnaround concept for data processing can increase input accuracy and decrease input time. This case history shows one application. (July)
George A. Khtaian

Information Collection, Storage Retrieval, Forms & Records Management

Economics Of Word Processing, The
Word processing is not an end in itself, but a part of the total business system to be used when and if there are advantages. (Nov.)
Benjamin W. Tartaglia

Information Imperative, The
Although billions of dollars are spent on the production and handling of information, the problem is where to go to find this information. (June)
Forest W. Horton, Jr.

Initiating A Records Management Program
Records Management comes from well established procedures, techniques, and responsibilities, not just a desire for control. (Aug.)
Charles Macbeth

Making The Management Report Useful
Often the management report fails to help the user because it does not contain needed information, or contains information never needed. (May)
Merle P. Martin

Stopping Inventory Shortages
When an inventory shortage occurs, one of three elements—people, records, or facilities—has been weakened. Here are some corrective steps. (June)
William N. McNairn

Where To Use Optical Mark Systems
The author looks at the advantages and disadvantages of Optical Mark Systems in telling what factors to consider before purchasing a system. (Mar.)
Hugh S. Evans

Automatic Data Processing Including Hardware, Software, and Applications

Comparing Computer Operations
Over 400 computer users were surveyed to compare cost and applications. The author gives the results of that survey. (Dec.)
Dr. Vernon W. Ruskin

Data Entry: A Cost Giant
Data preparation is expensive for any data processing installation. The author compares costs and effectiveness of today's systems. (Aug.)
Dr. Alfonso F. Cardenas

Equipment Small Business Selects
The author conducted a survey to determine if small scale hardware and packaged software have changed the buying habits of small business. (Jan.)
Dr. Susan L. Sólomon

Information Systems In Personnel—Part I
If personnel information is computerized without an overall systems plan, data can become hard to find and out of date. (Aug.)
Dr. Edward A. Tomeski and Dr. Harold Lazarus

Information Systems In Personnel—Part II
Here are the results of a study to determine to what extent the computer is being used by the personnel department for its applications. (Sept.)
Dr. Edward A. Tomeski and Dr. Harold Lazarus

Managing Federal Finances
The author gives the results of a study made to determine what use the Federal government makes of computers for financial management. (Oct.)
Dr. Earl M. Wysong, Jr.

Managers' Guide To Virtual Memory—Part I
Virtual Memory has been put in the spotlight with IBM's announcement that it is another significant advancement in data processing. (Jan.)
William P. Bradley

1973 article index

Systems Management Principles

Planning For The Metric Challenge
The metric system, preferred by the rest of the world, is coming in the U.S., and the systems professional must be ready. (July)

Information Systems In Personnel—Part II
Here are the results of a study to determine to what extent the computer is being used by the personnel department for its applications. (Sept.)
Dr. Edward A. Tomeski and Dr. Harold Lazarus

Managing Federal Finances
The author gives the results of a study made to determine what use the Federal government makes of computers for financial management. (Oct.)
Dr. Earl M. Wysong, Jr.

Managers' Guide To Virtual Memory—Part I
Virtual Memory has been put in the spotlight with IBM's announcement that it is another significant advancement in data processing. (Jan.)
William P. Bradley

Managers' Guide To Virtual Memory—Part II
Here is the second part of a three-part series on Virtual Memory that discusses the techniques and problems of implementing a VM system. (Feb.)
William P. Bradley

Managers' Guide To Virtual Memory—Part III
The final part of this series discusses the methods that can be used to improve the performance of a Virtual Memory system. (Mar.)
William P. Bradley

Measuring Computer Performance
The authors discuss several of the methods used to measure computer performance and show the limitations of each. (Nov.)
Dr. Israel Borovits and Eri I. Golombo

Mini-Modules Reduce Programming Effort
Many codes could be used exactly as they are for other systems if care were taken to design and generate the code properly the first time. (July)
Fred Schuff and Stephen J. Schuff

New Look At Computer Data Entry
This special report details the many alternatives and factors that management must consider before choosing or updating data entry equipment. (Feb.)
Raymond Ferrara and Richard L. Nolan

On-Line System For Accounts Payable, An
In certain accounts payable operations, an on-line computer system may provide greater efficiency at a lower cost. (May)
Dr. Eugene Sauls

Pay For Service Hospital Plan
The authors reveal the responses to a survey on how rates are set that was sent to computer centers that service various hospitals. (May)
Dr. Albert Ameiss, et al.

Program Design Uses Einstein's Theory
A standard design for any program and a uniform way to work will increase programmer productivity and free resources for other work. (Apr.)
John E. Connor

Software Security
One must not just protect software from potential disasters, but from the everyday risks that come just from being in the business. (Sept.)
Fenwicke W. Holmes

Telecommunications Techniques
Along with new telecommunications techniques come some new problems. The author provides some insight into how to handle these problems. (Apr.)
Richard J. Stenger

Management Sciences

Applying Information Theory To Man-Machine Systems
Information theory offers the user a mathematical tool for studying the operator and the machine as a communications channel. (July)
Dr. Larry E. Shirland

Excess Capacity Vs. Excess Maintenance
Every company needs some guidelines for making an economic analysis regarding excess capacity versus excess maintenance. (Sept.)
Jayant G. Sirdeshpande

Goal Programming
The most important step in developing a goal programming model is goal analysis. It forces management to know what it wants to do. (May)
Thomas E. Gibbs

Models For Examining Organizations
A model becomes useful when it helps make order out of confusing data. Its value is to allow for experimental pretesting of decisions. (Sept.)
Dr. Richard J. Tersine and Dr. Max B. Jones

Second Step Simplex
The author suggests that to more closely relate to real world situations the basic linear programming problem can be expanded. (June)
Philip W. Sisson

Simulating Cash Budgets
This article illustrates a probabilistic approach to increase the usefulness of information already required for a cash budget system. (Nov.)
Dr. David F. Scott, Jr., and Dr. Laurence J. Moore

Simulating Human Decision Making
The already overburdened manager can be freed from routine tasks by a computerized model that duplicates human decision making. (May)
Dr. Hugh J. Watson

Systems Approach To Corporate Modeling, A
An on-line system must be designed around properly defined objectives and then integrated into the company's general systems framework. (June)
Dr. James B. Boulden

Management Information Systems

Can Your Corporate Plan Achieve Its Goals?—Part I
The main drawback in corporate budgeting is that management often does not know if a planned project will produce the financial goal. (Mar.)
Dr. David N. Reps

Can Your Corporate Plan Achieve Its Goals?—Part II
In this final part, the author proposes a plan which will help corporate management know if strategic projects will fulfill financial goals. (Apr.)
Dr. David N. Reps

Classifying Information Systems
The author proposes a plan to classify a company's information systems so that they will be easy to visualize and to design. (Apr.)
Joseph W. Wilkinson

Forgotten Man, The
If only limited attention is given to a very important element of a MIS, the systems user, the MIS may never reach its full potential. (Jan.)
Dr. Charles D. Schewe

Logistics Planning Using Teleprocessing
The author shows how teleprocessing can help management make rapid decisions regarding the purchase of raw materials. (Oct.)
Dr. Robert E. Markland

MIS: Mirage Or Mirror Image?
A MIS is viewed differently by most managers, both as a way of thinking and as a result of that thinking. The answer lies somewhere in the middle. (Sept.)
Dr. Hart J. Will

MIS: Which Way To Go?
An organization must use the best of two different MIS design approaches to develop a system that best suits the information needs. (July)
Dr. Joseph M. Mellichamp

Predicting Information Costs
A cost prediction system will help the MIS user to determine in advance if the value of the information he wants exceeds the cost. (June)
Dr. Robert T. Riley and Dr. Thomas A. Williams

Tailoring The Information System
To be effective an information system must be designed to meet the decision making needs of each type of user in the organization. (Feb.)
Dr. John G. Burch and Felix R. Strater

Viewing MIS From The Top
From a manager's point of view, it is more important to classify management information systems by the type of output. (July)
Dr. David R. Anderson and Dr. Thomas A. Williams

Space and Facility Planning

Are Companies Bugged About Bugging?
It is the data communicator who must be concerned about the theft of the data that is entrusted to him to transmit. (Jan.)
Hank E. Koehn

Locating The Systems Department
Few managers will argue that the location of the systems department is important to its efficiency. But, where do you put it? (Dec.)
Dr. William E. Reif and Dr. Robert M. Monczka

Overhauling The Computer Center
Here is how a computer center was given a thorough examination and overhaul to improve manpower staffing, utilization, and control. (Mar.)
Dr. William F. Brown and Richard P. Mason

Privacy, Our Problem For Tomorrow
If and when an invasion of privacy occurs, it is people who are gathering, storing, and misusing the data, not the computer. (July)
Hank E. Koehn

Graphic Presentation and Reports

The Deep Charting Method
Some old techniques are given a new twist to give data processing personnel procedures that are easy to prepare, read, and follow. (Apr.)
Carlos S. Benge

Documented Sales Data Improves Forecasting
Before trying to forecast sales, one needs two years of past sales data and a journal showing events that could have influenced sales. (Aug.)
Dr. Michael D. Geurts

Master System Flowchart Documents Management Steps
The master system flowchart is a graphic presentation of the existing information flow of a company's computerized systems. (Apr.)
Paul S. Benoit

User Looks At COM, A
This case history shows some of the benefits and some problems encountered by a local government office when it converted to a COM system. (Oct.)
W. T. Kidwell

Using Critical Path At A University
Here is a case history that shows how, with limited manpower, a university used critical path to manage two major projects simultaneously. (Jan.)
Donald C. Bruegman

Specific Systems Case Histories

Applying Systems Analysis To Hospital Movements
Here is how systems analysis improved the flow of patients, personnel, supplies, and communications at a university hospital. (Oct.)
Dr. Floyd G. Miller

Data Dictionary/Directory System
This case history shows how a company designed a data dictionary/directory system that operates with a minimum amount of clerical effort. (Dec.)
George N. Martin

Doctor (And Computer) Will See You Now, The
The reduction of that seemingly enless waiting time in a doctor's office is just one of the many benefits of a medical automation system. (Mar.)
Dr. Bernard J. Schroer

Modern Property Identifier, A
Here is a case history that tells how a county government uses a flexible coding scheme for more effective data processing. (July)
Jerome E. Dyba

More Learning For The Educational Dollar
This case history shows how a university coped with the problem of using its resources to provide the best learning for the money spent. (Mar.)
Diane Henderson

Three-Day Week Of An EDP Operator
This case history shows the process involved and some of the problems encountered in installing a three-day work week. (Aug.)
M. C. Dobelis

Turnaround Concept For Personnel Records
The turnaround concept for data processing can increase input accuracy and decrease input time. This case history shows one application. (July)
George A. Khtaian

User Looks At COM, A
This case history shows some of the benefits and some problems encountered by a local government office when it converted to a COM system. (Oct.)
W. T. Kidwell
